

Demoparty Introduction

Gopher Graphics

What is a demoscene?

- Computer art subculture
- Started in the 80s
- Involved small programs which could be run on a home computer
- Often involves music and 3D animation

What is a demoparty?

- Large-scale get togethers of demosceners
- They usually grind over the course of a weekend
- Allows for lots of socialization
- Very similar to a “hackathon”

Assembly 2004 - Also a LAN party

Gopher Graphics Demoparty

- We have four topics
- Some are computer-sciencey and less artsy
- Others are artsy and less computer-sciencey
- Some can be both!
- You can start anytime
- We present on December 9th
- Members in the past have made:
 - Text art
 - Shader programs
 - Raytracers
 - 3D animations and models

TOPICS

We have four topics this time around! (Graphics programming is optional!)

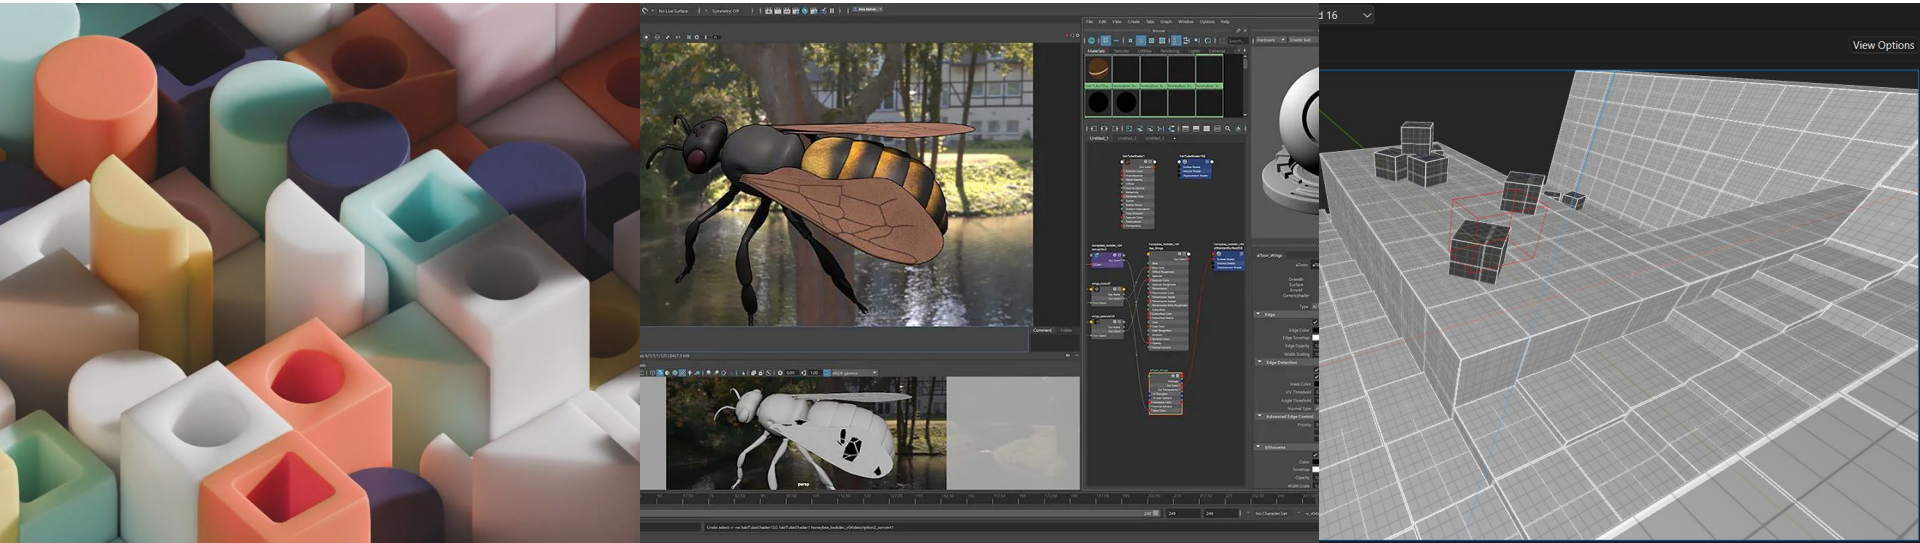

- Make a 3D render
- Take geometry, and do something cool with it
- Do something with shaders
- Assets for a videogame (real or imagined)

TOPICS: Make a 3D render

- Use your modeling skills to make a 3D render

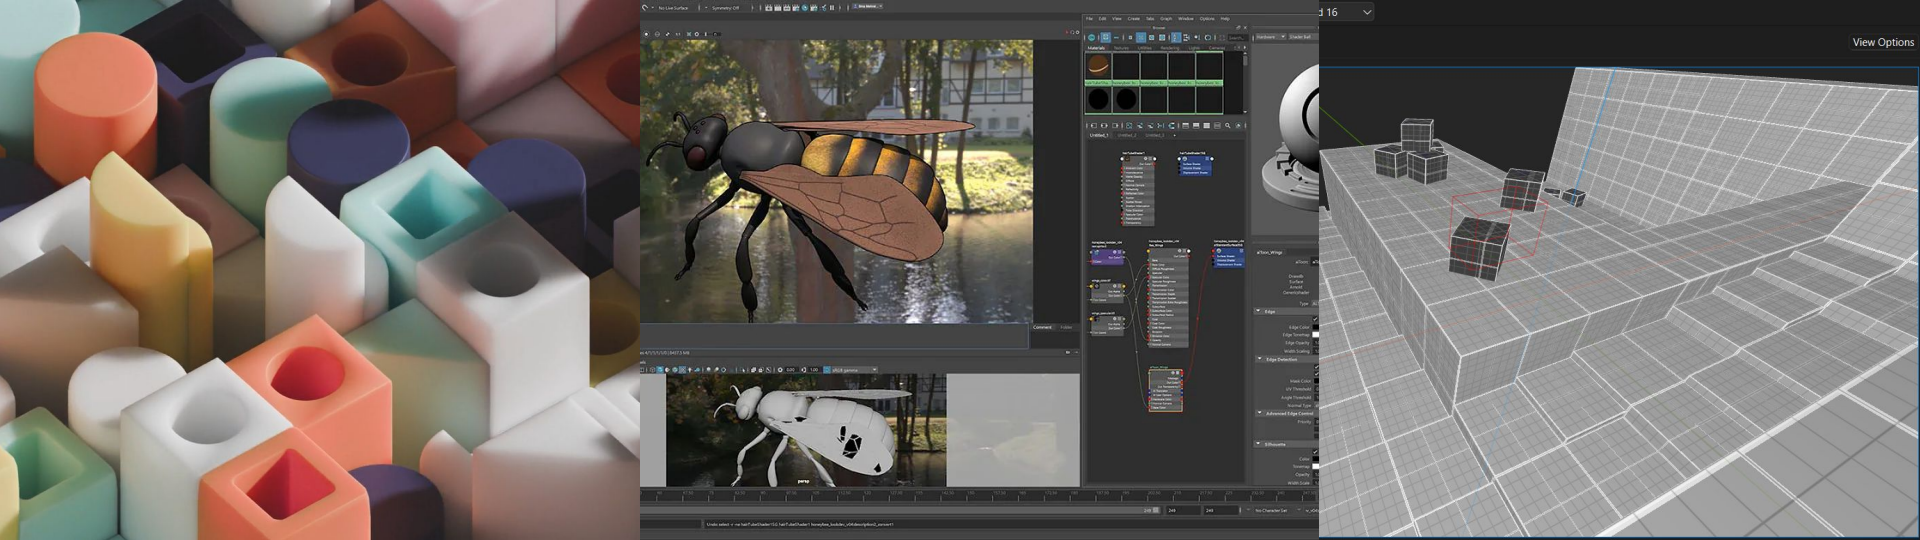

TOPICS: Make a 3D render

- Use your modeling skills to make a 3D render
- Blender? Maya? Scratch?

TOPICS: Make a 3D render

- Use your modeling skills to make a 3D render
- Blender? Maya? Scratch?
- Make your own models though!

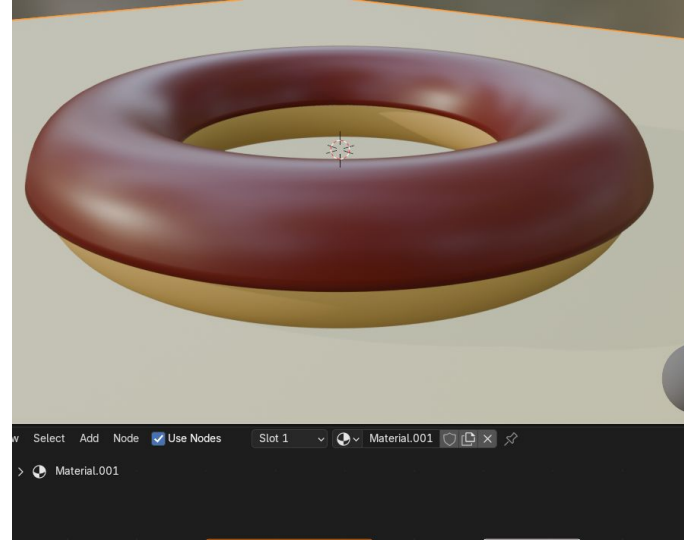

TOPICS: Make a 3D render

- Use your modeling skills to make a 3D render
- Blender? Maya? Scratch?
- Make your own models though!

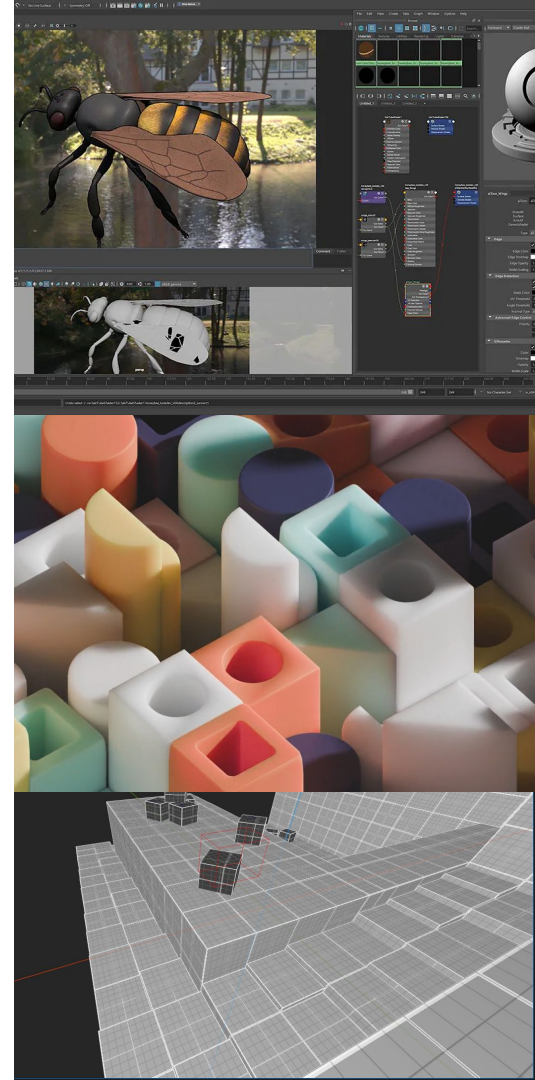

<- BAD!

GOOD! ->

TOPICS: Make a 3D render

- Use your modeling skills to make a 3D render
- Blender? Maya? Scratch?
- Make your own models though!
- Include images on your presentation!

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
- Cow example

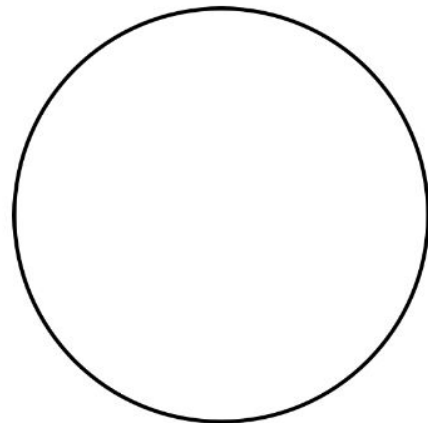

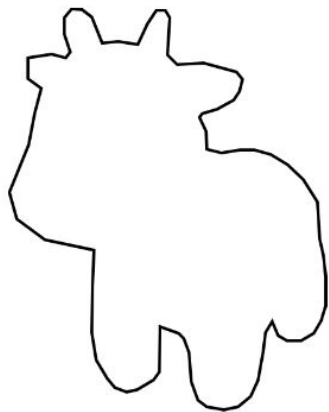

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
- Cow example

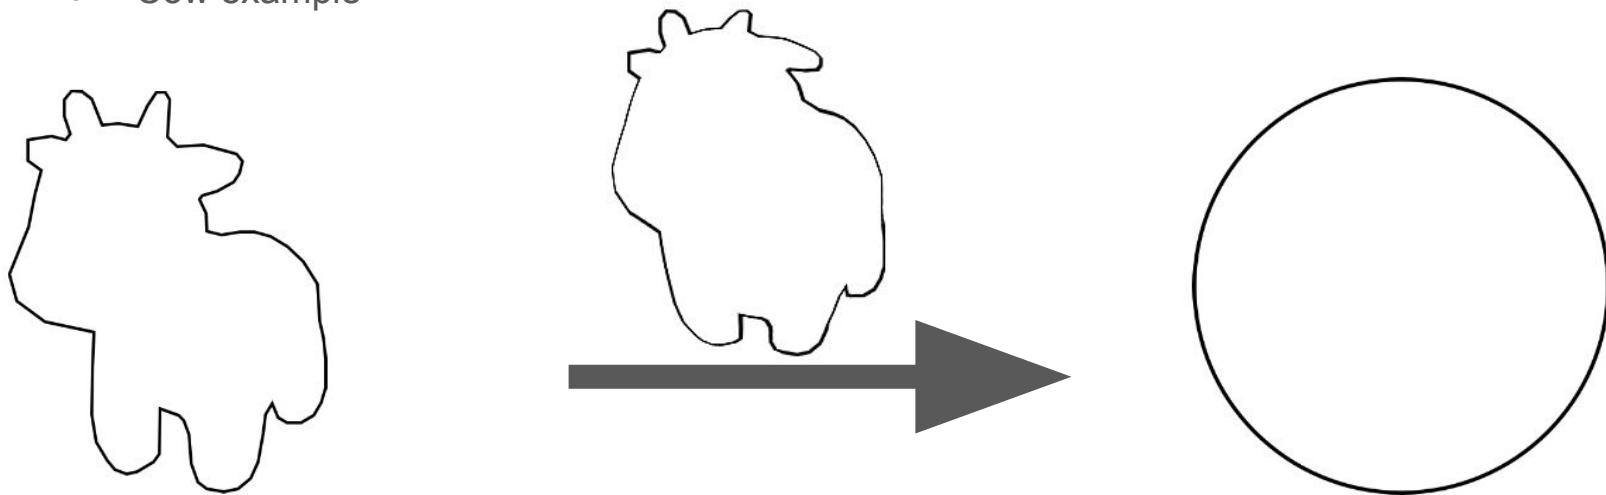

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example

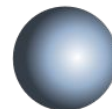

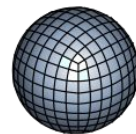

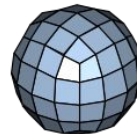

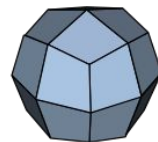

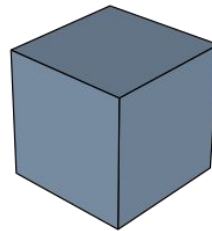

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example

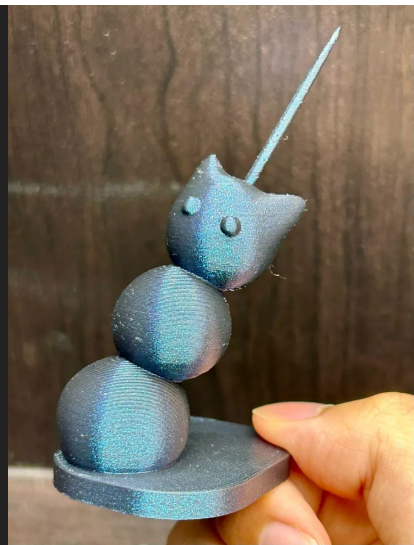

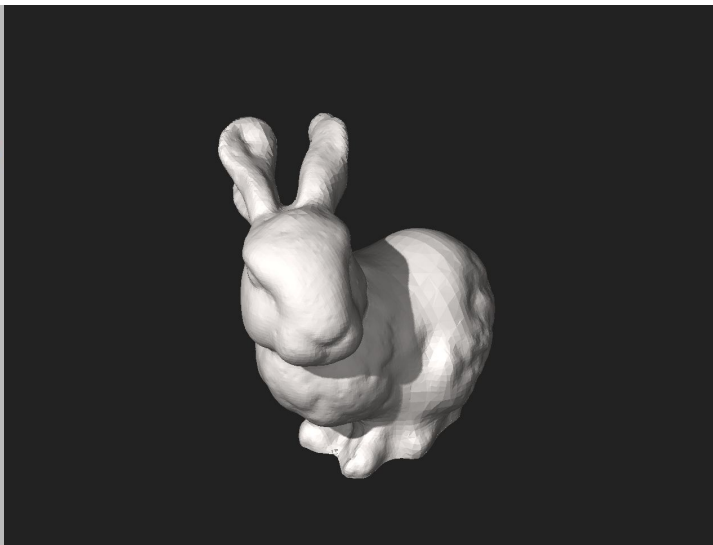

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example
 - Subdivision surfaces?

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example
 - Subdivision surfaces?
- We'll provide some models!

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example
 - Subdivision surfaces?
- We'll provide some models!
- 2D is good too!

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example
 - Subdivision surfaces?
- We'll provide some models!
- 2D is good too!
- Images are good!

TOPICS: Take geometry, and do something cool with it!

- Take some data, and write a tool to modify that data!
 - Cow example
 - Subdivision surfaces?
- We'll provide some models!
- 2D is good too!
- Images are good!
- Go crazy!

TOPICS: Make something with shaders

- You can use shadertoy or any sort of shader language
- Sky's the limit

TOPICS: Assets for a videogame (real or imagined)

- Pixel art, 3D models, character sheets, level models, VN backgrounds?

TOPICS: Assets for a videogame (real or imagined)

- Pixel art, 3D models, character sheets, level models, VN backgrounds?
- Collections/sets is good!

QUESTIONS

- Overlapping categories?
- Something that doesn't fit into any category?
- How to present on December 9th?
- Ask anything!
